

PAYBACK PERIOD

Once a prospective customer's current and/or planned oil/equipment/labor usage and cost information is obtained for their existing operations, then a Return on Investment model can be generated quickly to show operational costs with and without using the **puraDYN**[®] bypass oil filtration system as well as:

- Current cost per mile/hour
- Cost per mile/hour using the **puraDYN**[®] system (including installation)
- Payback and savings the first year and each year thereafter using the **puraDYN**[®] system
- Percent ROI

Significant savings can be illustrated to prospective customers to demonstrate and certify the cost effectiveness of the **puraDYN**[®] system to their business.
