SEC Approves puraDYN's Delisting from American Stock Exchange

- Company stock currently trading under new symbol PFTI -

Boynton Beach, FL - August 22, 2005, - puraDYN Filter Technologies Incorporated announced that the Securities and Exchange Commission (SEC) has notified **puraDYN** that the application to voluntarily withdraw the Company's common stock from trading and registration on the American Stock Exchange (Exchange) has been granted, effective at the opening of business on August 18, 2005.

The Company had previously submitted to the Exchange on June 24th, notice of its intent to voluntarily delist the Company's stock, a move to which the Exchange consented.

puraDYN earlier stated it was making efforts to facilitate the trading of its shares on the OTC Bulletin Board to ensure as seamless a transition as possible for its stockholders. A third party application for trading the Company's stock is currently under review by OTCBB staff.

It is the Company's understanding that there do exist market makers for the Company's shares, which will be trading under the symbol PFTI in the Pink Sheets during this transition.

About puraDYN Filter Technologies Incorporated

puraDYN designs, manufactures and markets the **puraDYN**[®] Bypass Oil Filtration System, the most effective filtration product on the market today. It continuously cleans lubricating oil and maintains oil viscosity to safely and significantly extend oil change intervals and engine life. Effective for internal combustion engines, transmissions and hydraulic applications, the Company's patented and proprietary system is a cost-effective and energy-conscious solution targeting an annual \$13 billion potential industry. The Company has established aftermarket programs with several of the transportation industry leaders such as Volvo Trucks NA, Mack Trucks, PACCAR; a strategic alliance with Honeywell Consumer Products Group, producers of FRAM[®] filtration products; and continues to market to major commercial fleets. **puraDYN**[®] equipment has been certified as a 'Pollution Prevention Technology' by the California Environmental Protection Agency and was selected as the manufacturer used by the US Department of Energy in a three-year evaluation to research and analyze performance, benefits and cost analysis of bypass oil filtration technology.
