## **Puradyn to Supply Its Bypass Oil Filtration Systems for Foreign Military Sales**

*- U.S. Military has ordered Freightliner trucks with **puraDYN**® systems installed -*

**Boynton Beach, FL – February 13, 2006 - puraDYN Filter Technologies Incorporated** (OTCBB: PFTI) announced today that the U.S. Military has ordered the **puraDYN**® bypass oil filtration system to be installed on trucks that Freightliner is supplying for foreign military sales. Freightliner is one of North America's largest manufacturers of heavy and medium duty trucks and specialized commercial vehicles.

Kevin G. Kroger, President and COO, Puradyn, said, "In 2005 we announced the preliminary results of a three-year test conducted by the U.S. Department of Energy wherein use of the **puraDYN** bypass oil filtration system resulted in an approximate 80% annual savings in oil costs and corresponding waste oil. The successful culmination of that testing, as well as a **puraDYN** product demonstration at a military facility in 2005, led to field testing of the **puraDYN** system on military trucks, which in turn led to this order."

Kroger continued, "This is an important start with the U.S. Military and a significant advance for Puradyn and we're currently working with Freightliner engineers on the factory installation." With respect to the demanding conditions these trucks will be sustaining - the more severe the environment, the more critical oil change intervals become to maintaining engine performance.

"We believe the **puraDYN** system represents a solution for the U.S. and foreign military insofar as providing extended oil drains and maintaining continuous clean engine oil on the run, to minimize oil-handling logistical problems. Other benefits include reducing field maintenance with respect to oil changes, labor and vehicle downtime. No special tools are required for service, and significantly reduced waste oil products are more easily dispatched. Additionally, the savings in oil, facilities and manpower are substantial."

Kroger concluded, "We continue our work with the U.S. Army on several other applications, of which all testing to date has been positive."

### **About puraDYN Filter Technologies Incorporated**

**puraDYN** (OTCBB:PFTI) designs, manufactures and markets the **puraDYN**® Bypass Oil Filtration System, the most effective filtration product on the market today. It continuously cleans lubricating oil and maintains oil viscosity to safely and significantly extend oil change intervals and engine life. Effective for internal combustion engines, transmissions and hydraulic applications, the Company's patented and proprietary system is a cost-effective and energy-conscious solution targeting an annual \$13 billion potential industry. The Company has established aftermarket programs with several of the transportation industry leaders such as Volvo Trucks NA, Mack Trucks, PACCAR; a strategic alliance with Honeywell Consumer

Products Group, producers of FRAM® filtration products; and continues to market to major commercial fleets. **puraDYN®** equipment has been certified as a 'Pollution Prevention Technology' by the California Environmental Protection Agency and was selected as the manufacturer used by the US Department of Energy in a three-year evaluation to research and analyze performance, benefits and cost analysis of bypass oil filtration technology.
