Major Construction Aggregates Company Places Orders for Over 150 puradYN[®] Bypass Oil Filtration Systems

- First orders received for equipment retrofit of the fleet of 1700 cement trucks -

Boynton Beach, FL – June 8, 2007 - Puradyn Filter Technologies Incorporated (OTCBB: PFTI) today announced that it has received an order for 150+ puradYN[®] bypass oil filtration systems from one of the larger suppliers of construction aggregates in the United States for use on its cement trucks. puradYN filters are already being installed on their large quarry haul trucks. This initial order for the cement trucks is to be supplied over the next few months. The total fleet potential is approximately 1700 vehicles for just one region of this company.

Standard oil changes for the haul trucks, which carry 35-40 gallons of oil, had been scheduled for every 300 hours. Through use of the puradYN system, oil changes are now being safely extended by over 100%, to 600 hours, at the customer's request. In all cases, oil analysis indicated that the engine oil was good for continued use.

Having extended this company's oil drains from a 300-hour interval to 600 hours, the puradYN[®] system has saved at least 50% of their oil acquisition and disposal but equally important, has allowed the vehicles to operate with continuously clean oil over a longer period of time.

Joseph V. Vittoria, Chairman and CEO, Puradyn, said, "We have been relatively quiet during the past few months but that's not to say that nothing has been going on. For example, our Thailand distributor has already to date succeeded last full year's total by 39% as demand for clean oil grows in other countries. The current atmosphere for green initiatives, energy conservation and protecting the environment is creating new interest in our technology, which aids in all of these areas.

Vittoria concluded, "We are confident, given the issues mentioned above, and the new emission requirements for trucks, off road equipment, and marine, that several of the long-running evaluations that we have had in place will be coming to fruition throughout the remainder of the year."

About Puradyn Filter Technologies Incorporated

Puradyn (OTCBB: PFTI) designs, manufactures and markets the puradYN[®] Bypass Oil Filtration System, the most effective filtration product on the market today. It continuously cleans lubricating oil and maintains oil viscosity to safely and significantly extend oil change intervals and engine life. Effective for internal combustion engines, transmissions and hydraulic applications, the Company's patented and proprietary system is a cost-effective and energy-conscious solution targeting an annual \$15 billion potential industry. puradYN[®] equipment has been certified as a 'Pollution Prevention Technology' by the California Environmental Protection Agency and was selected as the manufacturer used by the US Department of Energy in a three-year evaluation to research and analyze performance, benefits and cost analysis of bypass oil filtration technology.
