RE: Bypass Mobile Oil Purification System

Dear Mr. Sandler:

In response to your letter regarding Ford Motor Company's position regarding Ford warranty when Puradyn Filter Technologies Inc. bypass mobile oil purification system is used on engines installed in our vehicles, our position on the use of aftermarket products is as follows:

Ford Motor Company only recommends the use of genuine Ford certified filters and maintenance items on Ford products. When auxiliary devices, accessories, and/or consumables (filters, oil and fuel additives, synthetic oil, catalyst, etc.,) made by other manufactures are used on Ford products, the Ford warranty is not affected simply because of their use.

The Ford warranty continues to cover defects used by our material and workmanship. Failures resulting from the installation or usage of other manufacturers' products are not Ford factory defects, and, therefore, are not covered by Ford warranty.

Ford Motor Company is not in a position to evaluate the many auxiliary devices, accessories, and consumables promoted by other manufactures and their potential impact on Ford products. Installation or use of such items is, therefore, at the discretion of the equipment owner who assumes all risks for the effects resulting from their usage. This position should be made clear to customers/owners of Ford equipment whenever a proposal or inquiry concerning the use of non-Ford auxiliary/devices, accessories, or consumables is received from them.

I hope this helps clarify our position. If there are any further questions, please feel free to contact me.

Praful Patel,
Chief Program Engineer, Heavy F Series
